12. Speed boosts ✓
13. Extra life ✓
14. Shield ✓
15. Magnet ✓

Enemy and obstacles [Shoumik]

- 16. Obstacles will spawn randomly on the track. ✓
- 17. Two types of obstacles, ground obstacle (player will jump above them) and air obstacle (player will slide under them) ✓

Menu and UI system

- 18. Fixed framerate(60 fps) for consistent player speed and all element variables. ✓
[Shoumik]
- 19. Main menu ✓ [Rafi]
- 20. Pause menu ✓ [Rafi]
- 21. Game over ✓ [Rafi]

More Features :

Simple Mechanics

- Health and score as static UI: Display health and score at a fixed position on the screen using GLUT drawing functions; update only on events (obstacle hit, coin pickup, scene change).[wiki.gdevelop](http://wiki.gdevelop.org)
- Simple instructions overlay: Display a one-time static help screen with the controls before the game starts, cleared by a key press

Visual and Feedback

- Screen color flash on hit: Instantly change the background or player color for a frame when damage is taken.[wiki.gdevelop](http://wiki.gdevelop.org)
- Static Game Over display: Show a fixed "Game Over" message and score when health reaches zero, with a key press for restart.[wiki.gdevelop](http://wiki.gdevelop.org)
- Pause and resume: Press a key to manually pause updates and display a "Paused" message, then resume on another key press.[wiki.gdevelop](http://wiki.gdevelop.org)
- Main menu overlay: Before starting, display a static menu and wait for key input to begin.
